PROFESSIONAL SUMMARY

Financial Data & Reporting Analyst with extensive higher education institutional analytics experience (Master of Science in Analytics candidate, Saint Louis University; B.E. in Electronics & Communication). Demonstrated expertise supporting university administration and finance teams through recurring financial, operational, and enrollment reporting, budget-to-actual variance analysis, and automated ETL reconciliation. Skilled in Power BI (DAX, Power Query, star-schema data modeling), advanced Microsoft Excel (Power Pivot, complex modeling formulas, VBA), SQL (complex CTEs, window functions, query tuning), and institutional ERP/CRM data pipelines (Banner/Workday-aligned architectures). Proven record reducing reporting query latency by 40% across 8+ databases, validating data integrity across 10,000+ institutional records, establishing automated IV&V quality frameworks, and maintaining comprehensive data dictionaries under FERPA standards. Ready to support the Raymond A. Mason School of Business at William & Mary.

TECHNICAL SKILLS & CORE COMPETENCIES

BI, Reporting & Visualization: Microsoft Power BI (Advanced DAX, Power Query, Star/Snowflake Schema Modeling, RLS, Service), Tableau, Microsoft Excel (Power Pivot, XLOOKUP, INDEX/MATCH, Dynamic Arrays, Financial Modeling, VBA/Macros), Looker Studio, Executive Dashboards.
Financial & Operational Analytics: Budget-to-Actual Analysis, Variance Analysis, Trend Analysis, Fiscal Allocations, Enrollment Metrics, Revenue & Expenditure Tracking, Institutional Research, Accreditation & Ranking Support, KPI Design, Financial Presentations.
SQL & Data Management: Advanced SQL (Complex CTEs, Analytical Window Functions, Multi-Table Joins, Performance Tuning), PostgreSQL, SQL Server, Snowflake, DuckDB, Python (Pandas, NumPy, SQLAlchemy), R, Automated Data Reconciliation, Data Cleansing, ETL Pipelines.
Governance, Quality & Systems: Enterprise Systems (Workday/Banner Architecture Familiarity), Independent Verification & Validation (IV&V), Data Quality Assertion, Metadata Repositories, Data Dictionaries, FERPA Compliance, JIRA, Git / GitHub, Agile Sprints.

PROFESSIONAL EXPERIENCE

Saint Louis University — **St. Louis, MO**
Graduate Researcher, SPS Corps – Analytics Initiative — *August 2025 – Present*

- Deliver recurring financial, operational, and enrollment analytical reports to university academic leadership, translating complex multi-departmental datasets into actionable insights for strategic decision-making.
- Perform routine budget-to-actual variance analyses, revenue/expenditure tracking, and comparative trend evaluations, identifying contributing drivers for material changes across fiscal cycles.
- Architect automated data extraction and reconciliation pipelines across 8+ operational databases, refactoring nested queries into modular SQL CTEs and analytical window functions to reduce query latency by 40%.
- Develop and maintain interactive Power BI dashboards, advanced DAX measures, and Excel financial reporting models to monitor fiscal allocations, tuition/enrollment benchmarks, and departmental KPIs.
- Built automated data quality verification suites (IV&V) that enforce referential integrity and detect schema drift, establishing centralized metadata repositories and comprehensive data dictionaries.
- Developed a predictive forecasting engine pairing Prophet with PyTorch LSTM neural networks and automated anomaly detection (flagging deviations beyond ±2.5 standard deviations) to provide leadership with early budget variance alerts.
- Collaborate with academic administrators and cross-functional stakeholders in Agile cycles to translate reporting needs into technical specifications; conduct user guidance sessions for 25+ staff members.

Saint Louis University — **St. Louis, MO**
Data Analyst Intern / BI Developer — *June 2024 – August 2024*

- Built and refreshed 6 interactive Power BI and Tableau dashboards backed by star-schema models, consolidating 15+ operational and budgetary KPIs to enable leadership to monitor departmental productivity and milestones.
- Authored and tuned SQL extraction queries across institutional student databases (Banner-aligned), executing multi-table joins and data mappings to eliminate recurring reporting bottlenecks.
- Engineered automated data profiling and validation scripts in Python (Pandas) and SQL across 10,000+ institutional records, establishing webhook alerts that instantly catch data anomalies and transaction discrepancies.
- Enforced strict institutional data governance policies, establishing row-level security (RLS), FERPA compliance routines, and audit trails across sensitive student and financial records.

Entegra Sources Pvt. Ltd. — **Kathmandu, Nepal (Remote)**
Data Analyst / Researcher & Systems Analyst — *December 2022 – July 2023*

- Extracted, cleansed, mapped, and reconciled multi-source operational and financial transaction datasets (5,000+ records) into standardized 3NF relational schemas using Python (Pandas, SQLAlchemy) and SQL.
- Engineered automated validation routines and exception handlers in Python and C/C++, implementing boundary tests and reconciliation scripts to maintain 99.8% pipeline reliability across recurring reporting runs.
- Authored comprehensive technical documentation, data definitions, and reporting procedures to ensure reporting continuity and governance across teams.

FEATURED FINANCIAL & DATA ARCHITECTURE PROJECTS

SCD Type-2 Dimensional Data Warehouse & Analytics Engine — **Python, SQL, DuckDB, Star Schema, Kimball Modeling**

- Designed a Kimball dimensional data warehouse implementing Slowly Changing Dimensions (SCD Type-2) with surrogate keys and date tracking across 10,000+ records, preserving 100% point-in-time audit lineage for operational and financial analysis.
- Authored complex SQL window functions (LAG, LEAD, DENSE_RANK) to calculate rolling cohort retention, promotion velocity, and budget allocation trends, feeding an interactive analytics reporting dashboard.

CareGap — Decision Support & Operational Analytics Engine — **Python, DuckDB, PostgreSQL, Power BI, Streamlit**

- Engineered a high-performance analytics data engine over 34,000+ longitudinal records, integrating columnar DuckDB for sub-second analytical aggregations with PostgreSQL for transactional and relational integrity.
- Delivered 6 interactive Power BI / Streamlit views tracking quality performance measures and operational gap closure rates, implementing automated variance tracking and comparative benchmark analyses.

EDUCATION & PROFESSIONAL DEVELOPMENT

Saint Louis University | Master of Science in Analytics (STEM) — **St. Louis, MO | Expected May 2026**
Tribhuvan University | Bachelor of Engineering in Electronics & Communication (STEM) — **Kathmandu, Nepal | Conferred 2023**
Certifications: AI Engineer for Data Scientists Associate (DataCamp) · Building with Claude & Anthropic API (Prompt Caching & Tools) · Project Management & Agile Certification (GlobalShala & SLU).
